

## Only one edit window! How do I create "Read more..."?

Created: Wednesday, 06 August 2008 19:29 | Published: Thursday, 05 October 2006 14:00 | Written by [Super User](#) | [Print](#)

This is now implemented by inserting a **Read more...** tag (the button is located below the editor area) a dotted line appears in the edited text showing the split location for the *Read more....* A new Plugin takes care of the rest.

It is worth mentioning that this does not have a negative effect on migrated data from older sites. The new implementation is fully backward compatible.
