Learning a new language is always exciting, especially if you put in some creativity and loads of practice. Take a small trip down the memory lane, when you were younger about ten years old. Back in school we all were made to write one word about ten to fifteen times to make sure we've got the spelling right and that we remember it perfectly well.

Similarly, the repetitive method is extremely crucial even today when you are learning English, as it helps you to improve your communication skills and gives you a confidence about how to speak in English fluently.

## Write it down:

As and when you come across some words/ sentences that you know and are not able to recollect or are finding it difficult, it is only smart that you write it down. Writing it down will help you maintain a tab on your weak points and as and when you find the time you can refer to those notes and keep reading out those sentences/ words aloud in a repetitive manner to embed them in your memory.

subject matter and industry experts can certainly fetch the most desired results for improving spoken English skills. In this age of effective and advance communication technology, [online spoken English](#) programs are the most effective and convenient way to learn English.

For further information on our online English speaking courses or to experience the wonders of the virtual classroom, fix a demonstration session with our tutor.
